***Allowable Subject Matter***

The following is a statement of reasons for the indication of allowable subject matter: A method and apparatus for controlling a transmission power of variable rate frames of data are disclosed. The closest prior art, Henriksson and English, disclose similar method and apparatus. However, in combination with the other claimed limitations, Henriksson and English do not teach or fairly suggest the limitations of "receiving a gain adjustment value and a previous reference rate transmit value, and summing said gain adjustment value and said previous reference rate transmit value to provide a reference rate transmit power level" are neither anticipated nor rendered obvious by Henriksson and English.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
